This is a very good Amtrak loco that DTG ever stepped their game on with the design. The sounds are amazing and it has its own horn and bell which is not recycled but the engine sounds are good too assemuing they fit well with this loco. This beast will speed up quickly depending on the consist and if the speed limit allows. And if it is going to be used countrywide then I would expect some workshop scenarios for the other routes as well.

PROS:

- Good horn and bell sounds
- Realistic physics
- Two different liveries (Phase III and Phase V)
- Superliner stock for other routes but not made for Sliver Meteor that is involved with Miami to WPB
- Good interior
- In cab signals for Northeast Corridor routes

9V10. A great combination of mineweeper and RPG, I love both and find the game quite addicting. The game has a very promising setting and description, but it fell short of my expectations. I found myself consistently frustrated while attempting to complete the missions given to me by the terminal. In one mission I was supposed to find a mop, but couldn't locate it anywhere. In another, I was supposed to pick up cargo with a drone. I spent 15 minutes bumping it through space trying to push it into a box, and when I did, nothing seemed to happen. The instructions and controls were unclear, and I didn't have the patience to figure out what I was supposed to do, because of my next point:

I am not a person that tends to get motion sick or suffer from eye strain, but as soon as I got into the game, my eyes begin to hurt - a dull, throbbing pain. I believe that this was caused by either the very high degree of motion blur, or something else about the graphics. I checked the options menu for a motion blur setting (there was none) and tried decreasing the graphics quality, but it didn't help. The only other time I've felt eye pain like this while gaming was when viewing the 3D setting of the Nintendo 3DS.

I played for 40 minutes hoping that the apparent eye strain would go away, but it didn't. This, combined with the frustrating gameplay elements, forced me to request a refund.

However, despite these complaints, I am still voting that I recommend this game. Why? Because the developer clearly put time and effort into it, and I've seen far worse things on Steam. I don't think it's worth the sale price of \$10, but if it's on sale, give it a try if you're into space games. The concept of being an inmate on a space station was fun, and the game would have been fun if I wasn't in too much pain to play it.. This is the future of RO2. There was a man, fresh out of college. He was struggling to get a job, until he finally landed one in guarding a mall. Not a glorious job, not a well paid one, but it helped pay the bills.

Then a Swede, dressed as Charles de Gaulle, smashed him to death with an active German hand grenade.

Now, you can be this crazy Swede, dressed as a Frenchman, risking his hands to ruin somebodies life.

10V10 would buy again.. Very well made i love it.

The videos show promise, but the game doesn't deliver.

<https://www.youtube.com/watch?v=k8aV8AWq-tM>. I may have already reviewed this product but feel like doing so again after having it for a while.

First of all I really like it. I am amateur with this kind of software but can pick it up and make some cool things. Mostly for export to other programs as a background. It is really easy to make beautiful creations with it.

Pros: Fun, Different and beautiful. It also runs flawlessly for me.

Cons: Developers are a small team and do not update often. I might be doing something wrong but importing PNG to more than one layer?

. Crashes a few minutes after starting. Major improvements over the last game and a very cool twist to the rogue-like genre. I hope to see the devs expand upon the monster-possessing skill even further. It adds an element of strategy I haven't seen before in the genre.. Nice little puzzle game.. This game has a unique game mechanic I've never seen used before and is just overall really awesome to use. My only complaints with the game so far is the movement can feel slow at times and you don't have much control over your jumps. For example in a Megaman game you can control the height of your jumps and such. Here if you even lightly tap Z, your character goes flying all the way up into some traps. Overall I would highly recommend this game as it's a nice cheap, colorful, and fun game! Also the music is very catchy :P . I just hope a patch is implemented soon to make running and jumping smoother soon! (Especially since you get a rank based on your time in the game.). I never encountered any of the problem other people talked about. I think it's a great game that worth your money. The only downside is that the naval combat is clunky. I had to play this in window mode to avoid crashes. If you do not mind just how similar this game, especially the main character, is to Leisure Suit Larry, try this game. It is more subtle, and the wild west environment makes for an exciting effect. The ending might come as a surprise to some, but to me, it felt right! There are few games where the hero undergoes a major character development, and this game is one of them! Would recommend!. I like puzzle games, but this... Good idea, bad realization.. BUY. BUY. BUY. I downloaded the demo and only got to play one match but then realized that the full version was on sale for \$8. I took the leap and holy\u2665\u2665\u2665\u2665\u2665 it is amazing. First off, this game has a legit campaign with voice acting and real story. I don't know how long it is yet but because I only paid \$8 dollars I'm blown away by the value. The campaign is on rails but I didn't even care (I thought I would mind), it's really fun and engaging. I remember playing mech warrior as a kid and this gives me a big ol' nostalgia boner. Even at full price I think this game would be worth it. The multiplayer is not on rails and you get to fight mechs, what more could you ask for? The controls take time if you're used to shooters but you'll get it eventually. This is game was a legitimate surprise but in the best way possible.
