OK so, let's start :P

Pro's:

- Good gameplay
- Good ideas
- I think this game could be a very good game
- Cheap
- nice crafting and market ideas

Bad's

- Falay AI (not very intelligent sorry Falay)
- Invincible ai (yup you have good AI thats almost invincible)
- Spam!!!!!!!!!!!!!!!!!!!!!! of d1cks

So my word ,is that if you have like it was a sale and it was like 50 cents so if you can buy it :3

And keep in mind it's in Early Acces :D so if you come with cool ideas you can talk with the creators and have your ideas in game :3

Sweeeet game for that price :)

7V10 (compared with L4D)

+15V10 (compared with How To Survive)

6.5V10 (compared with my global rating system). Eh.

The puzzles are eh.

The mechanics are eh.

The concept is eh.

The visuals are eh.

The game is eh.. Love this game. Dont worry about the Naf graphics, as it's so playable.

Great arcade mode, and will get to No.1 place in target mode one day. :). Weather Lord: Hidden Realm is the second game in the Weather Lord series. The graphics are a bit different than the newer games in the series, but they aren't bad. The gameplay is pretty much the same as most time/resource management games, with controlling weather being unique to this series. It's as good as the newer games and much better than the first.. It's a very good game!. Beautiful visual novel and great story writing. The plot is very engaging. I plan to replay again and try to get all of the available endings.. Is a okay game and for the price isn't bad. However, I can't handle that it doesn't have a "repeat" button and going back to the main menu is just annoying for me.

Works great from Steam. On faster machines, you may need to go to the Options->Speed Settings menu and adjust to medium so that it isn't too fast. I also had to adjust my mouse speed in Windows settings to ensure the mouse didn't go fast across the screen, especially when navigating the map.. Very short and no challenge, just a few options which determine which story you get. Each one is short but sweet and thoughtful, well worth the 45 minutes or so that you will spend on it. There are a lot of terrible translation errors but it really doesn't matter.. The atmosphere of the game is great, and the art style is nice and creepy. My primary issue, outside the lack of settings customization in any form, is the game is just boring. Something new seems to happen everytime you die (assuming that's what happens) but there doesn't seem to be any motivation to keep going. If that is the point of the game then bravo.. Guns'n'Stories: Bulletproof VR - nice vr game!

beautiful graphics

Interesting gameplay

cheap price

good optimization

**RECOMENDED!**. There is something nostalgic about Pharaoh Rebirth, it feels like game you'd play on the SNES. I honestly think it deserves more attention, as its one of the best metroidvania's i've played. The dialogue is funny and the characters are all likeable too. Combat reminds me a lot of super castlevania IV, with the many options you get for attacking in different directions. It took me about 7 hours to get through the whole campaign with the extra levels included, which i good imo.
